RE: Personal Reference for Ky Lane

I have known Ky for a period of just over 12-18 months both socially and professionally whilst I have been working as a Principal Architect and Qld State Managing Director at Thomsonadsett Architects. During this time I have found Ky to be a dedicated, helpful, and reliable individual who has provided high level graphic design skills and visualisations to the projects in which he has worked in both the Retail, Commercial, Tertiary, Health and Aged care sectors

His ability at high quality graphic presentations, development of oculus rift files, and unreal 3 dimensional interactive renderings has been instrumental in the success of many of our teams projects. I believe his focussed attention and development of the high quality renderings for the Deakin University Burwood Plaza Project played a significant part in the positive client feedback and project development when presented to the Deakin University Portfolio Board. For this project Ky worked under extremely tight timeframes (undertaking significant after hours work with no request for overtime or TOIL) to deliver the highest quality rendered images and oculus model presentation that I believe the company had produced at this time.

Ky has also continued with his commitment and dedication to push the boundaries of the companies presentation techniques by assisting with further development of interactive 3-d fly throughs which has been used as a marketing tool by Charles Sturt University for their new Engineering Building in Bathurst. This project is marketed as a leading edge engineering building that reflects the development of their new concept in engineering schooling by Professor Euan Lindsay. As such any associated marketing and graphic material used by the client was to be reflective of this quality, and as such the development of the graphic material by Ky Lang also had to reflect this quality and cutting edge technology and design.

I have known Ky to be a continually diligent, hard worker who has been approachable at all times. I believe he possesses highly sought after skills which are beneficial to the delivery of projects in a variety of disciplines, and truly believe the presentation material he has developed for our team over the past 12-18 months has been instrumental in the success for many projects being formally contracted and locked in with extended scopes.

Please feel free to contact me directly to discuss in further detail, any queries you might have regarding Ky. I can be contacted directly on my mobile ph: 0438 182 075, or on land line ph: (07) 3840 9900.

Regards

Liza Ringdahl
